Power LogOn®

Multi-factor Authentication Enterprise Password Management

Power LogOn Online Government is a commercial-off-the-shelf (COTS) solution that lets IT Administrators centrally manage enterprise passwords while enabling government employees to securely access computers, servers, cloud accounts, websites, and applications with their existing PIV, PIV-I, CIV, or CAC badge—without them creating, remembering, typing, or managing passwords.

- Works with Federal and Non-federal Systems
- Addresses Executive Order 14306
- CMMS level 1 compliant

Power LogOn Certificate-based Offline Authentication (COA) is a commercial off-the-shelf (COTS), on-premises solution designed for high-security IT environments, where network or internet connectivity is not possible.

- Supports customer requirements with or without X.509 certificates
- Requires no additional PKI infrastructure changes
- Delivers strong security with AES-256 encryption, SHA-256 hashing and salting, and secure internet communication protocols
- Supports contact and contactless smart cards, magnetic-stripe cards, and RFID technologies
